

Care of Your iPad

Safety

- Keep track of your iPad at all times. Do not lend your device to another person.
- If you need to store it, lock it in your locker. (Do not share your locker combo with anyone.)
- Follow the Internet and Digital Citizenship guidelines.
- Follow the school district Acceptable Use Policy and your school policies and procedures.

Cleaning

- Use only a soft cloth, like a micro-cloth, to clean the screen of your iPad. For more thorough cleaning, use a soft cloth that is slightly damp with an approved cleaning product for iPads and tablet devices.
- Never use window cleaners or household cleaners to clean your iPad.
- The iPad is not scratch resistant. Do not use sharp objects on the iPad or write on with a pen or pencil.

Student Daily Use

- Come to school with your iPad fully charged.
- When not in use keep your iPad locked in your locker; never leave it unattended.
- Keep your iPad in its case, keep it on the device it at all times. We provided a very reputable one from Uzibull.
 - **Remember**, the case protects the iPad but not from all accidents and abuse.
- Take care when placing your iPad in your backpack.
 - The screen is made of glass and can become crushed if your bag is stuffed!
 - Be aware of what is packed on either side of the iPad.
- Never throw your backpack while it contains your iPad.
- All extreme temperatures can damage the iPad.
 - Keep your iPad out of the sun and do not leave it in a hot car. Heat will degrade your battery's performance.
- **Avoid** liquids, water and wet locations. Take care not to use your iPad in the rain, near sinks, or near beverages.

Battery Life

- The best way to charge the iPad battery is to connect the iPad to a wall outlet.
 - Do not charge or sync it to a computer. It will cause problems for the device and the software that manages it.
- Be sure to go through at least one charge cycle per month (charging the battery to 100% and then completely running the battery down.) This will help to keep your battery charge report accurate.
