

## WCSD Internal Video Streaming Directions

To stream video internally, we use Extron Video Streamers. There is one streamer at the ES and one streamer at the Secondary. The ES streamer is used for playing VHS, DVD, and YouTube videos. The Secondary Streamer is used to stream DVDs or live performances from the auditorium.

### To Connect/Play Stream

1. From the Desktop click on the **Start Button**
2. On the left find the **VideoLAN** folder
3. Click on it and it will expand
4. Click on **VLC media player**
5. After it opens, in the top left click on **Media > Open Network Stream...**
6. Under **Please enter a network URL:**  
For the ES streamer type:  
rtsp://esstreamer/extron **(this is case sensitive and will fail if not typed in correctly)**  
For the Secondary Streamer type:  
rtsp://audstreamer/extron **(this is case sensitive and will fail if not typed in correctly)**
7. Click on **Play**

### To Stream a Video at the ES

1. Insert DVD or VHS Tape into the player
2. If it's VHS, press play button (If needed, press rewind for the tape and hit play after finished)
3. If it's DVD, wait for the menu to appear on the monitor that is displaying the stream, then press play

### To Stream a Video at the Secondary

1. Please put in a Work Order Request to the Tech Department.
